LE GRAND INSTITUT

THE DARPHIN EXPERTISE

Since 1958, and faithful to the pioneering spirit of Pierre Darphin, Darphin Paris has been redefining skin health and rejuvenation through a unique approach inspired by kinesitherapy and founded on four dimensions: surface, volume, depth and movement.

The Darphin method integrates facial dynamism and functional movement at the very core of its protocols, delivering immediate sculpting results*. Inspired by the research into the morphology of aging and the principles of kinesitherapy, our protocols aim to help target facial contours and support visible youthful longevity.

From the Skin Morphosis diagnostic through to post-treatment follow-up, more than 65 years of morphological skin

expertise are expressed through our integrative treatment protocols, combining the power of the hand, the precision of high-performance formulations and cutting-edge complementary technologies.

Bordering Paris' prestigious Parc Monceau, Le Grand Institut Darphin stands as our new destination dedicated to skin morphology expertise. Conceived as a space of convergence between experts – dermatologists, facialists and posturologists – it fosters a comprehensive approach in which each discipline elevates our bespoke diagnostic and protocols.

A place offering transformative treatments for an integrative and sur-mesure skin approach.

* Morpho-Protocols are performed using the exclusive Cabin line and the Stimulskin Plus Night Balm.

“SINCE OUR FOUNDING IN 1958, TECHNOLOGIES AND METHODS MAY HAVE EVOLVED, YET OUR PROMISE REMAINS UNCHANGED: PERSONALIZATION AND PRECISION, IN THE SERVICE OF COMPREHENSIVE TRANSFORMATION.”

THE DARPHIN MORPHO-PROTOCOLS

A SUR-MESURE APPROACH

Rooted in Pierre Darphin’s original expertise and inspired by kinesitherapy, the Darphin Method is grounded in a morphological and dynamic reading of the face and body. Guided by the Skin Morphosis diagnostic, it considers the skin and its structures as a living architecture in constant interaction: surface, volume, depth and movement.

Each protocol is designed as a targeted response. Highly precise manual techniques, controlled intensity of gestures, advanced technologies and high-performance formulas are orchestrated according to the unique structure, tensions and functional dynamics of your face.

EACH GESTURE CONCENTRATES MORE THAN 65 YEARS OF MORPHOLOGICAL EXPERTISE

“Our treatment protocols begin with a comprehensive understanding of the interactions between structural components of the face and body. Our Morpho-therapists begin each treatment with a complete face and body diagnostic, the essential starting point of a bespoke approach that focuses on targeting and supporting skin’s health.”

LAURE LE LIBOUX
Hospitality and Service Innovation Director

OUR MORPHO-THERAPISTS

EXPERTISE BEYOND TECHNIQUE

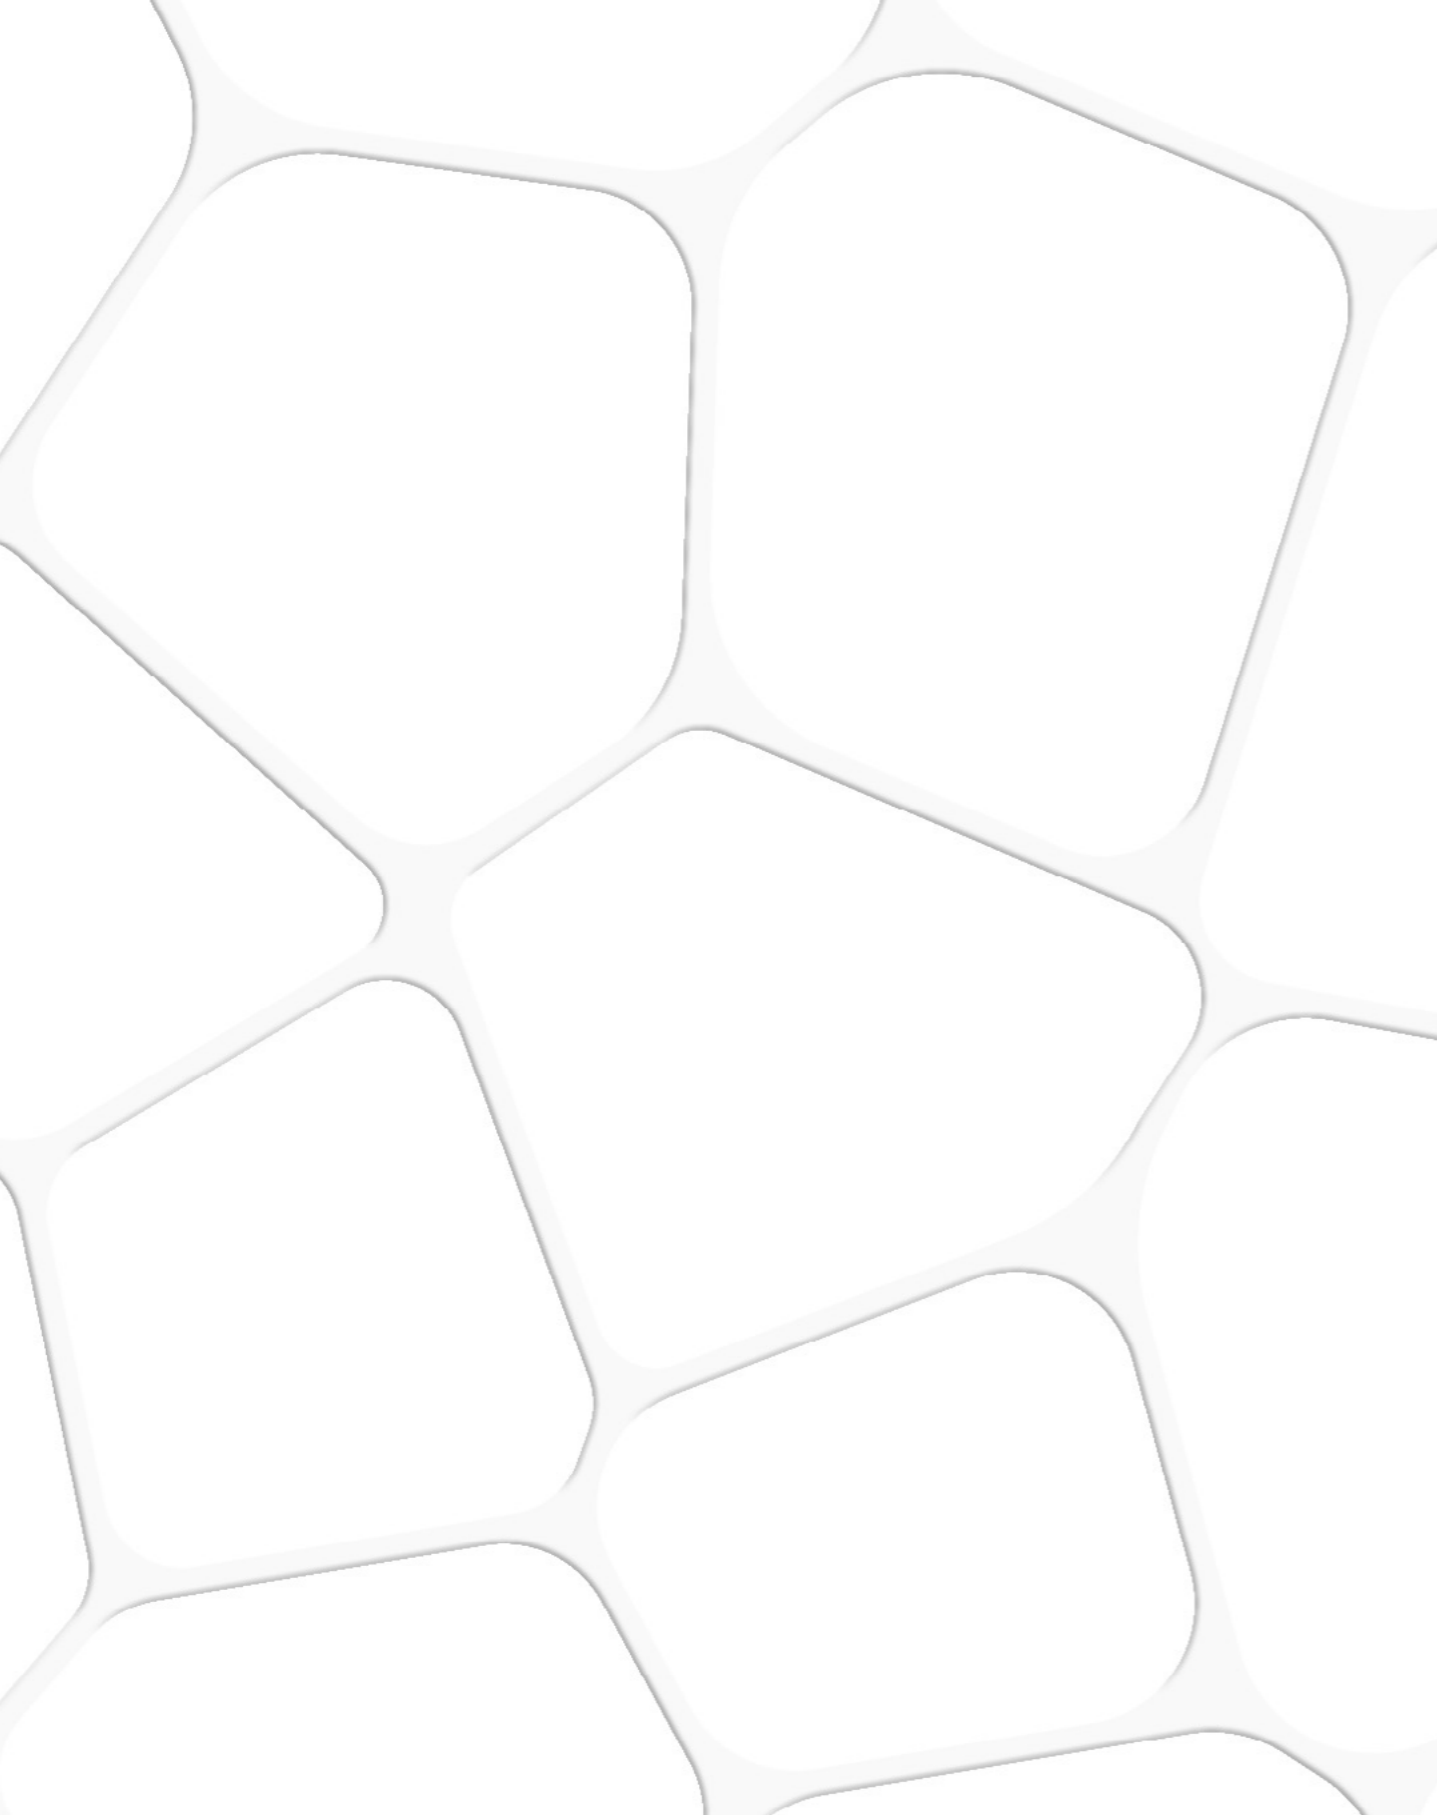

Our Morpho-Therapists are highly qualified professionals trained to approach the face and body as dynamic anatomical systems.

Their expertise goes beyond traditional aesthetic practice. Each therapist undergoes more than 150 hours of advanced training, focused on anatomy, myofascial structures, muscular dynamics and precise manual techniques inspired by kinesitherapy principles.

This rigorous curriculum is validated through a comprehensive certification process, including initial qualification and continuous advanced training to ensure high levels of mastery and consistency.

Through their unique combination of anatomical knowledge, technical precision and tactile intelligence, our Morpho-Therapists can deliver treatments that are structurally informed, deeply personalized and results-driven*.

* Morpho-Protocols are performed using the exclusive Cabin line and the Stimulskin Plus Night Balm.

Facial Morpho- Protocols

“OUR FACE IS IN CONSTANT MICRO-MOTION, WITH SHIFTS THAT CAN OCCUR SEVERAL TIMES PER SECOND. NOT TAKING MOVEMENT INTO ACCOUNT GIVES A PARTIAL AND UNPREDICTIVE VIEW.”

THE SKIN MORPHOSIS DIAGNOSTIC

SUR-MESURE FACIAL DIAGNOSTIC
IN FOUR DIMENSIONS

Skin Morphosis combines advanced technological imaging with the expertise and tactile intelligence of our therapists to deliver a comprehensive kinetic diagnostic of the skin and facial morphological structures.

Inspired by Pierre Darphin’s pioneering vision of diagnosing the skin in movement, Skin Morphosis pushes this visionary expertise further through cutting-edge technology and advanced morpho-analysis. It evaluates 4 essential skin dimensions through 20 precise parameters.

Unlike traditional assessments, Skin Morphosis analyzes the skin in motion. It helps examine how facial structures are impacted by different facial expressions, how muscular foundations can influence skin architecture, and certain underlying imbalances invisible to the naked eye.

This morphotype-driven analysis allows us to design highly targeted, fully bespoke treatments - precisely adapted to your skin’s reality and motions.

THE MORPHO-PROTOCOLS FACE

THE SUR-MESURE MORPHO-PROTOCOL

Inspired by Darphin's original expertise rooted in kinesitherapy and guided by the Skin Morphosis diagnostic, the Sur-Mesure Morpho-Protocol is a highly personalized treatment designed to address the face as a dynamic structural system.

The experience unfolds in three essential phases:

Preparation – A targeted cleanse, helps rebalance and enhance skin receptivity to the following treatments.

Stimulation – A precise myofascial massage targets the muscular foundations of the face, with JetPeel™ technology*, which delivers tailored exfoliation and highly potent corrective actives into the skin - each formula selected according to your Skin Morphosis diagnostic.

Anchoring – A bespoke mask consolidates and anchors the treatment, while Stimulskin Plus Night Balm supports structural and visible results**.

A fully tailored morpho-approach that restores harmony between structure, movement and skin surface - for comprehensive transformation.

THE MANUAL RESHAPING PROTOCOL**

Guided by the Skin Morphosis diagnostic, the Manual Reshaping Protocol is a fully bespoke treatment designed to sculpt the face through targeted manual expertise.

Drawing on advanced myofascial release, sculpting and targeted stimulation, this protocol precisely addresses muscular tensions and adhesions and targets structural imbalances. Slow, intentional maneuvers help release tensions, adhesions, while lifting and repositioning gestures re-harmonize facial contours.

Each sequence is individually designed, addressing areas of deep tension, sagging or imbalances identified during the Skin Morphosis diagnostic.

An expert manual approach that re-educates the face: restoring balance and supporting contour reshaping.

THE MANUAL
RESHAPING PROTOCOL

THE MORPHO-PRECISION ADD-ONS

FACE

TARGETED PROTOCOLS

Highly targeted interventions designed to focus on a specific strategic morphological area of the face to complement your chosen protocol.

Identified through the Skin Morphosis diagnostic, these precision enhancements allow us to complement our Sur-Mesure Morpho-Protocols on the face most crucial areas - whether addressing a specific tension, adhesion, loss of definition or imbalance.*

Within the Manual Reshaping Protocol, they take the form of additional expert massage sequences to further rebalance the targeted areas of concern.

They combine focused expert massage with JetPeel™**, infusion of tailored corrective actives to accompany the transformation.

A precise, localized approach delivering advanced complementary results.

Body Morpho- Protocols

THE INAUGURAL BODY DIAGNOSTIC

SUR-MESURE BODY DIAGNOSTIC

A comprehensive structural evaluation designed to decode the body's architecture and balance.

Rooted in our deep morphological expertise and through a precise assessment of postural imbalances, areas of muscular tension, and myofascial condition, the Inaugural Body Diagnostic provides insight into how the body compensates, stores tension and evolves over time.

By analyzing both structural alignment and skin quality, this diagnostic allows us to design highly personalized massage treatments – ranging from specific muscular and adhesion release, to postural rebalancing.

A foundational step towards postural alignment, fascia release and recontouring.

THE MANUAL CONTOURING PROTOCOL

BODY

Guided by the insights of the Inaugural Body Diagnostic, the Manual Contouring Body Protocol is a fully personalized, hands-on treatment designed to support contour harmony and balance.

Based on the assessment of kinesitherapy dynamics, posture, muscular tensions and adhesions, the morpho-therapist selects and adapts precise manual techniques to help address the body's specific needs.

The protocol may focus on deep release to re-harmonize movement and target muscular and postural imbalances; or on contouring techniques for comprehensive transformation. Each maneuver is performed with expert precision, directly informed by the findings of the diagnostic.

A bespoke manual approach that targets the foundation of the body for a lignent, fluidity and visible contouring.

THE MORPHO-PRECISION ADD-ONS

BODY

Defined through the Inaugural Body Diagnostic, the Body Morpho-Precision Add-Ons are highly targeted interventions focusing on a specific strategic morphological area, in complement to your body protocol.

Selected and adapted according to your structural assessment, they provide localized expert gestures, complementing our personalized morpho-treatments in your journey towards revitalization and rejuvenation.

Whether addressing localized tension, postural imbalances or contour irregularity, these precision interventions allow the morpho-therapist to intensify expert manoeuvres where the body needs it.

Le Grand Protocole

DARPHIN

LE GRAND PROTOCOLE

OUR EXCLUSIVE SIGNATURE EXPERIENCE

Inspired by the pioneering legacy of Pierre Darphin, visionary kinesitherapist and one of the first to conceive personalized, fresh and extemporaneous formulas prepared directly for his clients within his Parisian Institute, Le Grand Protocole is rooted in the continuity of this founding vision.

As early as the 1960s, following an in-depth diagnostic, creams were formulated on site, to match the specific needs of each individual skin, within an approach combining clinical expertise, expert manual techniques and bespoke formulation.

Today, Le Grand Protocole extends this heritage and represents the most accomplished expression of Darphin's

expertise. The haute couture standard of skincare distilled into a comprehensive sur-mesure morphological program, designed to respond with precision to the biological composition and functional tensions unique to each client's skin.

Born from this protocol, the Sur-Mesure Polyactivated Serum is a singular creation, hand-crafted within the Grand Institut laboratory. It is conceived from a precise analysis of your skin morphology with expert orchestration of actives selected for their synergy and alignment with your skin's evolving needs. Each formula tells a unique story: that of your skin's architecture, translated into a composition of exceptional precision.

1950 €

INCLUDING THE COMPLETE SUR-MESURE SKINCARE PROGRAM IN FOUR PHASES AND THE CREATION OF A PERSONALIZED 3-MONTH TREATMENT CURE.

THE TREATMENT PROGRAM UNFOLDS IN FOUR ESSENTIAL PHASES, SUPPORTED BY CONTINUOUS FOLLOW-UP:

PHASE 1

SKIN MORPHOSIS DIAGNOSIS

Our advanced morpho-diagnostic analyzes your skin across four dimensions – surface, volume, depth and movement – to define your skincare priorities with ultimate precision.

PHASE 2

SUR-MESURE MORPHO-PROTOCOL

Guided by the Skin Morphosis diagnostic, our 90-minute signature protocol is performed within our Private Suite, designed to host our most advanced treatments: a space where scale, discretion and mastery of touch are fully expressed.

It restores functional balance through targeted preparation and expert myofascial stimulation, complemented by the JetPeel™* technology, which enables the infusion of highly concentrated corrective actives, followed by a bespoke mask designed to anchor the treatment.

*JetPeel™ is a trademark of TavTech.

PHASE 3

YOUR SUR-MESURE POLYACTIVATED SERUM

Formulated exclusively from the Skin Morphosis results, your Sur-Mesure Polyactivated Serum is a unique creation, hand-crafted within Le Grand Institut laboratory while you receive your treatment. A truly singular formula, built from a refined morphological analysis and the expert orchestration of actives selected for their bespoke efficacy on your specific skin profile.

Presented in three vials (3 × 30 ml), the serum accompanies your skin's transformation over the following weeks. Your personalized polyactivated formulation is designed for three months of use to pursue the excellence of the protocol performed at the Institut in the comfort of your home.

PHASE 4

POST-PROTOCOL ASSESSMENT

Throughout the program, you are accompanied by your dedicated Morpho-Therapist, who ensures personalized follow-ups and adapts the protocol according to your skin's progression. After three months, a final diagnostic objectively evaluates the visible transformation and defines the next steps.

Le Grand Protocole transcends conventional standards and embodies authentic exclusivity, where science, gesture and formulation converge to create the pinnacle of personalization.

BY APPOINTMENT ONLY

YOUR INDIVIDUALIZED SKINCARE JOURNEY BEGINS WITH A CONSULTATION CONDUCTED BY A DEDICATED MORPHO-THERAPIST AT LE GRAND INSTITUT DARPHIN.
